Subject: The Forest Creek Mixed Use Community proposal

November 3, 2008

Dear Mr. Brian Bacchus;

I am writing to protest The Forest Creek Mixed Use Community proposal and the rezoning of the property at the southeast corner of Forest Hill-Irene Road and Shelby Drive. The proposed rezoning calls for it to be changed from office use and Commercial property to Residential use. This proposal is clearly not in the interest of the adjacent Forest Creek Planned Development residents who all live in single- family homes. This proposal calls for Mayfield Road to be opened and used as a throughway to the site. Also I am concerned that this project is expected to be built in phases lasting possibly three to five years. This would mean ongoing construction traffic and flying dirt for some time as each phase adds its' resident traffic. Also, with the present uncertain economy this could be a stop and go project with an unpaved street and uncompleted apartment buildings.

I hope I can count on you to convince the other members of the Memphis-Shelby County Office of Planning and Development that this proposal is undesirable.

Thank you for your consideration of my views.

Sincerely,

Kendra Simmons
